

Please help me to repair a classroom in my home village primary school-Nkwasangare.

Nkwasangare is one of the few primary schools located in my home village-Nshara, Machame Kilimanjaro. The school's classrooms are not only inadequate but they are also in a very bad condition, which is unsuitable for learning. As if that is not enough, there are no enough desks for all pupils. So this forces some pupils to sit on the floor. There are other many issues, which I can't finish explaining here but the following few pictures can speak for themselves.

The picture below is of a collapsed classroom. A new classroom to replace this one has been built. However, the rest of the classrooms will potentially collapse. This is dangerous and it's a health and safety threat for children and teachers.

The pictures below are of a new building that is now under construction. We would like kids to move in into these new classrooms by January 2013. This is the building that we are pledging money for. A couple from the US helped us with a donation of over 4000 US \$ and it took us very far. So far we are depending on individual donations from villagers (whose income are considerable low, and thus very slow progress) and also volunteers who help in kind (manpower, advice etc). We need about 15,000 US \$ to finish the building.

The picture below is girls' toilet. After finishing the classrooms, our plan is to refurbish these toilets to an acceptable standard.

Below is a picture of some of the children who go to Nkwansangare. These children are my neighbors. I see and talk to them often. I asked them to take their picture so I can raise awareness about their school and raise funds for it. They accepted. Note your help is a gift to these children and the future generation.

When you donate anything you will receive an acknowledge receipt from the School itself. You can donate through MPESA, Western Union, or Bank Transfer. Please contact me @ aikande.kwayu@gmail.com or call +255765512171. Thank you!
